EDUCATION

University of California, San Diego

B.S. in Computer Science

San Diego, California

Expected Graduation, Dec 2026

- o **GPA:** 3.63/4.00
- o **Related Coursework:** Data Structures & Algorithms, Computer Organization (CSE 30 - C programming, ARM assembly), Web Development, Object-Oriented Programming, Computer Organization, Operating Systems, Theory of Computation, Machine Learning, Statistics & Probability, Computer Networks, Database Systems, Computer Vision, Data Science, Computer Graphics, Modern Cryptography

EXPERIENCE

1Cell.AI

Bioinformatics / Engineering Intern

Foster City, California

Jun 2025 – Sep 2025

Evaluated the viability of Amazon HealthOmics and built internal tools for genomic pipeline design and lab operations.

- Researched and evaluated Amazon HealthOmics use cases for cancer variant detection and large-scale genomics, contributing to technical and business feasibility analysis.
- Developed a full-stack mobile inventory app using React Native, Node.js, Express, and PostgreSQL with camera input and image storage via AWS Rekognition.
- Built a shipment tracker web app in Next.js with PostgreSQL, integrating FedEx API for delivery status updates.

Automatiq.io

Platform Engineering Resident (Frontend)

Foster City, California

Sep 2025 - Dec 2025

- Built production-ready user interfaces including multi-step onboarding flows, account settings panels, and tabbed dashboards using React and modern JavaScript
- Developed reusable components with clean state management, integrated API endpoints, and maintained styling consistency aligned with Figma design specifications
- Implemented complex UI features including lightbox modals, bot workflow tabs, and dynamic form handling with real-time data persistence
- Debugged and resolved critical front-end issues to ensure platform stability and launch-readiness

PROJECTS

HealthMadeEasy – ER QuickPass

Mobile App Prototype

San Diego, California

Apr 2025

- Developed a React Native app prototype to speed up ER check-ins by sharing patient info securely via QR code.
- Built a HIPAA-compliant system using Firebase and Xcode, focusing on ease of use for all patients.
- Collaborated in a fast-paced team at DiamondHacks 2025; future plans include hospital integration.

Tech: React Native, Firebase, JavaScript, Xcode, Expo

ACTIVITIES AND LEADERSHIP

Coding Society

Leader

Sancta Maria International School, Hyderabad, India

Jul 2022 – Jan 2023

- Led a 25-member coding club; taught algorithms, Python, and project development; fostered teamwork and creative problem-solving.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, HTML/CSS, SQL

Databases & Cloud: PostgreSQL

Tools: Git/GitHub, Figma, Canva
